- a/ Type of service offered: 1 - physicians'; 2 - surgeons'; 3 - hospital; 4 - drug; 5 - dental.
- b/ For units shown under the various state headings to have reported physicians' and surgeons' charges. These units total 462 and cover 587 counties in 33 states with a membership of 58,745 families, 306,939 persons or 75 percent of the total reported membership in units offering physicians' and surgeons' services on a fee-for-service basis. In Region III several units pay not more than 50 percent on physicians' and surgeons' charges at the end of each quarter, delaying further payment until the end of the year. Such units have been left out of account in estimating Percent paid on physicians' and surgeons' charges.
- c/ This figure represents the amount paid rather than the approved charges for units paying for service on the basis of the number of families for which the physician, hospital or dentist has accepted responsibility for professional care.
- d/ For units for which charges for hospital services are shown under the various state headings. There are 255 such units in 328 counties which include hospitalization among the services offered on a fee-for-service basis. These units had a membership of 38,367 families, 206,010 persons.

The figures shown in the column headed Percent of physicians' and hospital charges are taken from reports of units which include hospital care among the services offered and represents the percentage of total charges for physicians', surgeons' and hospital services which has been made for hospital service in these units. The total charge for physicians' and surgeons' service in these units was \$86,003.33. This with the \$11,342.86 hospital charges shown in the table, makes a total of \$97,346.19 of which the hospital charges are 11.7 percent.

- e/ These figures represent the approved charges, percent paid and number of persons served for dental units shown under the various state headings to have submitted reports for January covering services rendered on a fee-for-service basis. There were 65 such units with a membership of 8,901 families, 46,426 persons. These totals do not include the dental service of units offering this service, along with physicians' services.
- f/ Figures showing membership totals have been taken from reports for months other than January.

- a/ Type of service offered: 1 - physicians'; 2 - surgeons'; 3 - hospital; 4 - drug; 5 - dental.
 - b/ For units shown under the various state headings to have reported physicians' and surgeons' charges. These units total 447 and include 565 counties in 33 states with a membership of 56,718 families, 298,646 persons or 71 percent of the total reported membership in units offering physicians' and surgeons' services on a fee-for-service basis. In Region III several units pay not more than 50 percent on physicians' and surgeons' charges at the end of each quarter, delaying further payment until the end of the year. Such units have been left out of account in estimating Percent paid on physicians' and surgeons' charges.
 - c/ This figure represents the amount paid rather than the approved charges for units paying for service on the basis of the number of families for which the physician, hospital or dentist has accepted responsibility for professional care.
 - d/ For units shown under the various state headings to have reported expenditures for hospital services. There are 216 such units in 268 counties which include hospitalization among the services offered on a fee-for-service basis. These units had a membership of 34,720 families, 184,127 persons.
- The figures shown in the column headed Percent of physicians' and hospital charges are taken from reports of units which include hospital care among the services offered and represents the percentage of total charges for physicians', surgeons' and hospital services which has been made for hospital service in these units. The total charge for physicians' and surgeons' service in these units was \$66,892.25. This with the \$10,960.32 hospital charges shown in the table makes a total of \$77,852.57 of which the hospital charges are 14.1 percent.
- e/ These figures represent the approved charges, percent paid, and number of persons served for dental units shown under the various state headings to have submitted reports for February covering services rendered on a fee-for-service basis. There were 70 such units with a membership of 9,164 families, 47,085 persons. These totals do not include the dental service of units offering this service along with physicians' service.
 - f/ Figures showing membership totals have been taken from reports for months other than February.

Newly reported medical care units:

Region I -

Pennsylvania: Bradford and Sullivan Counties, a joint unit and Wyoming County.

- a/ Type of service offered: 1 - physicians'; 2 - surgeons'; 3 hospital; 4 - drug; 5 - dental.
- b/ For units shown under the various state headings to have reported physicians' and surgeons' charges. These units total 443 and include 560 counties in 33 states, with a membership of 57,095 families, 297,782 persons or 69 percent of the total reported membership in units offering physicians' and surgeons' services on a fee-for-service basis. In Region III several units pay not more than 50 percent on physicians' and surgeons' charges at the end of each quarter, delaying further payment until the end of the year. Such units have not been taken into account in estimating Percent paid on physicians' and surgeons' charges.
- c/ This figure represents the amount paid rather than the approved charges for units paying for services on the basis of the number of families for which the physician, hospital, or dentist has accepted responsibility for professional care. U.S. and regional totals also represent only the experience of capitation units shown under the various state headings to have reported for this month.
- d/ For units shown under various state headings to have reported expenditures for hospital services. There are 224 such units in 299 counties, which include hospitalization among the services offered on a fee-for-service basis. These units had a membership of 34,776 families, 183,017 persons.

The figures shown in the column headed Percent of physicians' and hospital charges are taken from reports of units which include hospital care among the services offered, and represents the percentage of total charges for physicians', surgeons', and hospital services, which has been made for hospital service in these units. The total charge for physicians' and surgeons' services in these units was \$70,375.14. This with the \$12,200.84 hospital charges shown in the table, makes a total of \$82,575.98 of which the hospital charges are 14.8 percent.

- e/ These figures represent the approved charges, percent paid, and number of persons served for dental units shown under the various state headings to have submitted reports for March covering services rendered on a fee-for-service basis. There were 76 such units with a membership of 9,120 families, 49,175 persons. These totals do not include the dental service of units offering this service along with physicians' services.
- f/ Figures showing membership totals have been taken from reports for months other than March.
